

### Child Clinical Psychology (1970-2004)/Clinical Child Psychology (2004-Present)

The Child Clinical Psychology area of emphasis was created during the departmental re-organization in 1976. The 4 faculty members who comprised this area at that time were initially part of the Clinical Psychology program area. Because they were only in the Clinical program area for a short time, their entire tenure at WVU is shown in this table. The area changed its name in 2004 to be congruent with the national term used for this specialty area.

1970	John D. Cone
